MRL Chart Legend

Report Generated 1/27/2016; www.GlobalMRL.com

This report includes an MRL Chart for pesticides with established Canadian MRLs for Canola (rapeseed). This chart provides an easy to read MRL reference for comparing across countries.

MRL values are provided in Parts Per Million (PPM)

black font	Actives with established Chinese MRL sufficient to meet Canadian MRL
black font	Chinese MRL insufficient to meet Canadian allowable levels
red font	No established Chinese or Codex MRL
black font	Codex MRL with sufficient levels to meet Canadian allowable levels (No Chinese MRL)
black font	Codex MRL, but insufficient to meet Canadian allowable levels

-- (dash) indicates a maximum residue level/limit (MRL) is not established for the commodity and the pesticide active ingredient
 * (asterisk) indicates additional MRLs in effect and applicable to the raw agricultural commodity and active ingredient

Codex refers to the international food standards governed by the Codex Alimentarius established by the UN Food and Agriculture Organization (FAO) and the World Health Organization (WHO)
EU is the European Union of 28 member states
USA United States of America
Default indicates that the MRL value displayed is a default tolerance. Some markets defer to a default MRL value when a specific MRL has not been established for a commodity and active ingredient
